

# 'One Stop Shop for Infinite Solutions'

With over 20 years of excellence, world-class talent and innovative breakthroughs, PCB Power Market has come a long way to become one of India's leading PCB designers and manufacturers today. The focus on high-quality and economically viable systems combined with unmatched consistency

**-Kushal Panchal, Vice President, PCB Power Market**

has made PCB Power Market the firm of choice throughout India. Customers rely on the company for their requirements in research & development, aerospace & defense, automotive, railways, medical, educational, telecommunication, industrial electronics and other critical areas of development.

PCB Power market is customer-centric and believes in making things simpler for its customers. Be it design, customisation or a component to do-it-yourself (DIY), the company has solutions for all – from customised designs to PCB layouts, from power stencils to soldering solutions, from fabrication to assembly, from heatsinks and mounting kits to thyristors and triacs, from varistors to switches, from capacitors to rectifiers, to thousands of small and large components that are required to build state-of-the-art PCBs. With everything under a single roof, the PCB Power Market is the first of its kind in India – one stop shop for infinite solutions.

Flexibility and innovation are at the heart of how the company meets customers' needs. PCB Power Market believes in providing solutions that meet the customers' requirements – solutions that

are revolutionary at the same time. Cutting-edge high frequency-RF metal clad PCBs, RT Duroid and higher layer count with lean manufacturing and SPC, are among the ground-breaking solutions, manufactured at an UL certified facility.

With spirit and enthusiasm, a team of creative, experienced and highly competent engineers, designers, and staff at PCB Power Market takes care of customers across the globe, delivering quality – every single time.

## **What is the theme of your booth at Automation Expo 2018?**

The theme of our booth is going to be the Visitor Experience Centre.

## **What are the new products that you will showcase and their USP?**

We will showcase three new products – PCB Visualiser, a Brand New Online Store and Online Electronic Components Tool.

## **How compatible are these with existing set up as well as current trends?**

Our new products are in-line with the growing trends in the electronics research & development sector. Our vision is to empower our customers to create faster and more cost-efficient electronics prototypes.

## **Products/systems at the exhibition**

Printed circuit boards, assembled printed circuit boards, soldering tools, electronic components, and mechanical parts and stencils.

## **PCB Power Market.**

**Hall 1, Booth H36, 37 at Automation Expo 2018**
